Garth,

I'm proposing that CINP invite a representative from CNL to discuss collaborative work in their new Government Owned Corporation Operated (GOCO) model.

To give some idea of what they have in mind (from their website <http://www.cnl.ca/en/home/default.aspx>)

Canadian Nuclear Laboratories is a world leader in nuclear science and technology offering unique capabilities and solutions across a wide range of industries. Actively involved with industry-driven research and development in nuclear, transportation, clean technology, energy, defence, security and life sciences, we provide solutions to keep these sectors competitive internationally.Â

Â With ongoing investments in new facilities and a focused mandate, Canadian Nuclear Laboratories is well positioned for the future. A new performance standard reinforced with a strong safety culture underscores every activity.

Probably best to have people look over this site specifically as it lists what equipment they have:

<http://www.cnl.ca/en/home/facilities-and-expertise/all-facilities/default.aspx>

They're looking for collaboration with academics.

Cheers,  
Jason
